Truman Sherrill (OT)

Harold Whittemore "Buddy" Sherrill

Charles Sherrill

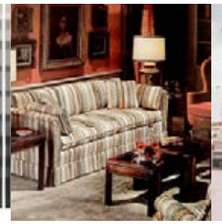

From Modest Beginnings

"It was never just about the money. Good companies are all about the people, and the families who make this industry possible."

—CHARLES SHERRILL

1920

As World War 1 ends, a young Oscar Truman Sherrill (OT) returns home from US Army Infantry duty and begins working in the casegoods furniture industry.
By the 1930s, OT Sherrill becomes one of the first trained upholstery craftsmen in Hickory, NC employing manufacturing techniques taught by master craftsmen from the Michigan furniture industry.

1940

OT Sherrill and two office employees begin building upholstery in a leased building near downtown Hickory.

1943

Buddy Sherrill graduated from Hickory High School and was drafted into the Army Air Corps aviation cadet program.

1945

Sherrill Furniture Company incorporated by OT Sherrill with a goal to provide a good living for his family. World War 2 ends before Buddy Sherrill's aviation training and deployment to combat.

1950

Buddy Sherrill graduates University of South Carolina® with a degree in business administration and retail. Returns home to join the family business that is beginning to thrive as department stores and the post war home boom begins to take off.

1960

Sherrill Furniture Company grows rapidly in leading department stores and furniture stores around the country. OT and Buddy Sherrill gain a larger vision of providing for their family and creating good jobs for the community they live in.

1997

Sherrill Furniture Company acquires Hickory White Company that is in financial distress, as low cost imported wood furniture from China decimates the industry. Buddy Sherrill's goal was to keep the business running and the people there employed in order to preserve the community of skilled casegoods craftspeople in the Catawba Valley region.

2002

Sherrill Furniture showroom undergoes major expansion adding-on a 2nd and 3rd floor to create over 100,000 square feet of space.

2007

The Great Recession hits. Sherrill Furniture Company is forced to trim some jobs and overhead, but does whatever it takes to keep factories humming and the craftspeople who make quality casegoods and upholstery furniture employed.

KINGSDOWN® HANDCRAFTED MATTRESSES SINCE 1904

MATTRESS

5" Interspring mattress is standard.
Air Dream mattress is available for an upcharge.
+ indicates styles available with optional Air Dream mattress.
Queen size mattress 60" x 73" – standard in sleep sofas.
Twin size mattress 40" x 73" – standard in sleep loveseats.

KINGSDOWN's exclusive SLEEP IN MATTRESS INNER ROLL construction makes this the ideal innerspring mattress made for sleep sofa use. The Kingsdown Sleep In Mattress is the standard by which others are judged.

1. **Luxurious comfort** – cover is INNER ROLL quilted to thick layer of Kingsdown quality foam.
2. **Allergy Free** – Exclusive Flexatron is a blend of all man made fibers, thermally bonded in an oven at over 400˚F providing an environmentally friendly and hypoallergenic padding material.
3. **Mildew resistant and odor free** – unlike raw cotton materials which is a natural medium for bacteria growth and retains moisture, FLEXATRON will not host mildew or odors.
4. **Longer life and more support** – inner spring units are totally oven tempered giving the units "memory". The units have resiliency which provides longer lasting performance.
5. **No coil feel** – FLEXATRON insulation is thermally bonded for permanent shaping, wrapping the inner- spring unit, hugging the edges so it can never shift, lump or bunch. This application eliminates pocketing of insulation.
6. **Improved seating comfort when used as a sofa** – Exclusive INNER ROLL construction with channel quilting prevents bunching, easier to fold flatter and store away.
7. **Environmentally friendly mattress** – engineered with all man made fibers and CFC-free foam cushion material does not produce flurocarbons which are damaging to the environment.
8. **Securely locked cover and insulation** – Flanging and hog ringing locks cover and cushioning into place. This INNER LOK process prevents bunching and traveling.

Sherrill Construction

Please read carefully when furnishing COM

For a COM fabric with patterns and/or less than 54" wide, please supply extra yardage as indicated below.

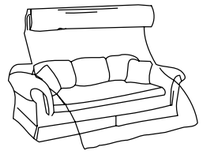

Fabric Width	Repeat 5"-15"	Repeat 15"-21"	Repeat 21"-29"
54"	20%	25%	30%
48-50"	30%	35%	40%
36"	105%	110%	115%

This information is intended as a guide only. There will be cases due to unusual repeats or designs of the fabric that will require additional yardage.

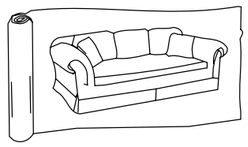

Fabric Application: "Railroading" or "Up the Bolt"

Many Sherrill fabrics are cut to "Railroad" on the furniture; others are not because of the direction of the pattern in the fabric. Every fabric is swatched in the direction it will be cut for the furniture. If the fabric is cut to "Railroad" on the furniture it will state, "This Fabric Cut To Railroad." An explanation of exactly what this term means is shown below.

Fabric in "UP THE BOLT" or "REGULAR" Position
(Note: With one seat cushion seaming is necessary on 60" loveseat.)

Fabric in "RAILROADED" or "TOP TO SELVAGE" Position

The reason for cutting those fabrics to railroad when possible is to avoid seams.

54" fabrics not "Railroaded" when applied to long cushions or narrow fabrics not "Railroaded" when applied to most cushions will require seaming. THE FACTORY WILL POSITION THESE SEAMS AT THEIR DISCRETION. If particular placement is desired, it must be stated on your order. All swatches show fabric width. Velvets normally will be applied in the REGULAR position because of the pile or nap unless we are instructed otherwise.

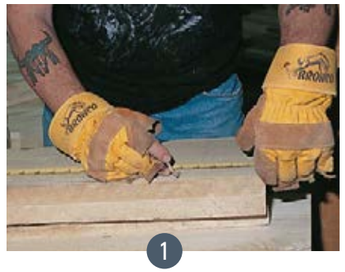

Unless Customer furnishes written instructions with orders as to application of fabric, our own judgement will be used in applying the fabric.
Sherrill will not assume responsibility for imperfections in the fabric, dye-lot variations or wearing qualities of any COM yardage.
No quality problems will be accepted on post treated fabrics, due to the mills not accepting complaints after this application.

NOTE: Standard construction on most styles. Subject to change without notice.

Frame Construction

Sherrill blends traditional hand craftsmanship with modern manufacturing methods to produce frames that are among the finest used in the upholstery business.

1

Each frame is precisely cut and hand assembled.

2

Double dowels are utilized in all structural parts to form sturdy, long lasting joints.

3

To complete construction and add stability to the frame, large precisely cut corner blocks are positioned at each corner where the greatest stress occurs using both glues and screws.

Eight-Way Hand-Tied Spring System

The eight-way hand-tied system with full web bottom is characteristic of high quality furniture and is traditionally the best known technique for insuring long lasting comfort.

4

Sherrill mounts a solid interlace web bottom to each frame. Springs of various gauges and heights are securely attached to the full web bottom using clinch fasteners.

5

The individual spring coils are hand-tied and bound together in eight separate directions using polyester cording. The cording is then securely anchored to the frame.

Back Construction (varies depending on style)

6

Polypropylene covering is used over the 8-way hand-tied springs and the sinuous wire spring backs as a protective shield and to provide a substantial base for various filling materials.

7

A typical Lawson style back has sinuous wire springs anchored to the frame and held together horizontally by coated wire to prevent turning.

8

Marshall units are used when thickness of back and styling permits.

Fabrics

The Sherrill fabric line is as extensive and varied as any in the upholstery business. Sherrill stocks a complete selection of colors, patterns, weaves and yarns - all carefully selected to complement the design and craftsmanship of your new Sofa or Chair. All fabrics are carefully inspected for quality and consistency prior to being placed into stock.

Specialized cutters take particular care using individual patterns to create the proper pattern flow.

Specialized technicians perform various sewing tasks using the finest available sewing thread, sewn seven stitches to the inch to assure more durable seams and trouble free wear.

Each individual piece is cut by hand to assure that each style will exceed Sherrill's stringent tailoring standards.

Sherrill Construction

Filling Material

On most styles the standard filling material is urethane foam combined with polyester fibers and cotton felt.

9

Generous layers of polyester batting and cotton are used in conjunction with urethane foam to achieve just the right contour and comfort.

Outside arms and backs are padded to assure a smoother surface and provide an extra measure of neatness.

Cushions

At Sherrill the standard cushion filling is U-D, a high density reinforced urethane core

10

Available also is Super UD filling, a high resiliency urethane with 2-1/3 ounce fiber.

Both cushions are encased in a sewn casing.

Other cushion filling options are spring-down, comfort-down and comfort-fiber.

Sherrill offers loose pillow back options fiber-down and Shertrel.

Shertrel is standard in loose backs unless otherwise stated in the price list.

When cared for properly and rotated on a regular basis Sherrill cushions will provide years of trouble free comfort.

Upholstery

At Sherrill we are as careful applying a fabric as you are selecting one for your home. Each piece is painstakingly hand-tailored by specialized technicians who have spent years perfecting their trade.

Custom Options

Inspection

Sherrill's higher standard of quality is assured by thorough inspections throughout the manufacturing process. Skilled inspectors inspect frame, fabric, cutting, sewing and upholstery. After a final inspector carefully checks each piece one more time, Sherrill seals in the quality by custom packing each piece prior to shipping.

Fabric Options: Mitered & Box Mitered

This option is available on ottoman tops and throw pillows.

Ottoman with a mitered top.

Ottoman with a box mitered top.
